

Think Deep

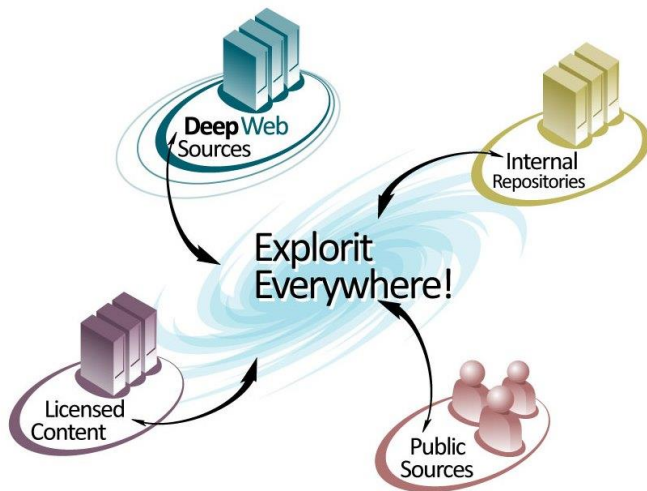

Explorit Everywhere™ Deep Web Search and Discovery

Strategic Retrieval for Content and Information Analysis

As the number of digital and electronic resources continues to grow, faster access to quality information is a strategic necessity for your organization's survival. Explorit Everywhere! is a real-time discovery system, accessing multiple information sources simultaneously to display relevant material and quality content.

Serving Fortune 500 companies, the Science.gov Alliance, the U.S. Department of Energy, and a variety of research and library alliances, Deep Web Technologies has built a reputation as the "researcher's choice" for its advanced, agile information discovery tools.

One Query, Multiple Sources One Result List

Features & Benefits

One intuitive search page accesses all collections and reduces the time to generate aggregated and ranked result list;

Search Widgets take your search to your users on any web page they may use;

Powerful search capabilities including Boolean, wildcard and fielded search deliver highly relevant results;

Incremental results display quickly, as deeper search continues in the background;

Intelligent clustering shows text and visual groups of semantically associated results;

Tabs segregate results into categories for simple identification of result types;

Limits and Filters drill down into results lists with full text limit, sort by and limit to specific sources;

Automatic alerts create efficient updates of new results via RSS and email;

Web Services and Web 2.0 architecture facilitates integration and utilization of Explorit within an enterprise;

Graphical collection monitoring and search statistics ensure reliability, performance and improved ROI across research processes

Personal Library feature downloads selected result citations to RefWorks or another citation manager to store result lists;

Search Builder creates multiple search portals for departments or groups within your organization;

About Deep Web Technologies

Deep Web Technologies

creates custom, sophisticated federated search solutions for customers who demand precise, accurate results.

Founded by industry thought-leader Abe Lederman, Deep Web Technologies developed the powerful **Explorit Research Accelerator** to search, retrieve, aggregate and analyze content from deep web databases—data that is inaccessible to general search engines.

Designed to simplify the search, retrieval and discovery process for knowledge researchers, **Explorit** delivers the integrity and credibility high-profile customers need.

Deep Web Technologies is based in Santa Fe, NM where it has twice earned awards as one of the fastest growing high-tech companies in the state.

The screenshot displays the WorldWideScience.org website interface. At the top, the logo 'WORLDWIDESCIENCE.ORG The Global Science Gateway' is visible. Below the navigation bar, a search bar contains the text 'Search: Full Text: greenhouse gas reduction'. The results page shows a list of search results, with the first result titled 'Greenhouse Gas Reduction' from the German National Library of Science and Technology. The page also features a sidebar with navigation options like 'Topics' and 'Country', and a 'Deep Web Technologies' logo in the top right corner.
