

# Explorit Everywhere! Medical

Premier Federated Search  
by Deep Web Technologies

## Precise Medical Research

Explorit Everywhere! Medical is the perfect tool to reduce the time you spend hunting for information and to ensure that leading research is not overlooked. Rapidly evaluate emerging evidence with a single search. If your sources have systematic reviews, practice guidelines, essential medicines information or other important evidence you need, Explorit Everywhere! Medical will quickly find it for you.

With one search, you can scour the breadth of your subscription, public and internal sources to return the most relevant results in a single page. Make your information accessible, simple and research-friendly to all of your research disciplines.

## Medical Thesaurus Integration

Topics Visual MeSH

MeSH (Medical Subject Headings) is the NLM controlled vocabulary thesaurus used for indexing articles for PubMed

1. ["Myocardial Infarction"](#)
2. ["Vascular Calcification"](#)
3. ["Inferior Wall Myocardial Infarction"](#)
4. ["Anterior Wall Myocardial Infarction"](#)
5. ["Myocardial Bridging"](#)

## Your Sources, One Search

If you have more than five sources of information that you search regularly, you can dramatically improve your research efficiency with Explorit Everywhere! Medical. Search sources such as AccessMedicine, CINAHL Plus, Dynamed, PubMed, and Medline FT together from a single search and results page.

## Features & Benefits

- One, intuitive search** page accesses all sources and generates de-duplicated, aggregated and ranked results.
- Incremental results display** quickly for initial evaluation, as deeper search continues in the background.
- Link Resolver and Proxy integration** for seamless access to documents from your application and from off site.
- Medical Thesaurus Integration** suggests like terms to search on.
- Related Content Sidebar** provides specific medical news or other pertinent content.
- Full Text search** limits your search results to display only results with full text links.
- Intelligent clustering** shows text and visual groups of semantically associated results.
- Tabs** segregate results into categories for simple identification of result types.
- Limits and Filters** drill down into results lists with full text limit, sort by and limit to specific sources.
- Personal Library** saves selected result citations for future use or uploads to citation managers.
- Automatic alerts** create efficient updates of new results via RSS and email.
- Search Builder creates multiple search portals** for departments or groups within your organization.
- Search Widgets** take your search to your users on any web page they may use.
- Graphical collection monitoring and search statistics** ensure reliability, performance and improved ROI across research processes.

## About Deep Web Technologies

**Deep Web Technologies** creates custom, sophisticated federated search solutions for customers who demand precise, accurate results. Serving Fortune 500 companies, the Science.gov Alliance, the U.S. Department of Energy, and a variety of research and library alliances, Deep Web Technologies has built a reputation as the “researcher’s choice” for its advanced, agile information discovery tools.

Founded by industry thought-leader Abe Lederman, Deep Web Technologies developed the powerful **Explorit Everywhere!** to search, retrieve, aggregate and analyze content from deep web databases—data that is inaccessible to general search engines. Designed to simplify the search, retrieval and discovery process for knowledge researchers, **Explorit Everywhere!** delivers the integrity and credibility high-profile customers need.
